- Monolingual language enthusiast
- Pets  

WordPress.org

WordPress.org

- global audience
- translated into 200+ languages
- growing audience in India, Africa

The image displays a 2x4 grid of eight screenshots of the WordPress homepage in various languages. Each screenshot shows the top navigation bar with the WordPress logo and links to Showcase, Plugins, Themes, Hosting, News, Resources, and About. The main heading and subtext are translated into the respective language. The languages shown are English, Spanish, Lao, Bengali, Turkish, Colombian Spanish, Polish, and Vietnamese. The grid is separated by dark blue lines.

Relive all the sights and sounds from Kraków, Poland. [Read the recap](#)

با وردپرس آشنا شوید

سکوی انتشار متن‌باز منتخب برای میلیون‌ها وب‌سایت در سراسر جهان — از تولیدکنندگان و مشاغل کوچک گرفته تا سازمان‌ها.

Issue scope

- We want to have consistent design across all sites
- There are many languages to support
- Each site will have at most two languages
- We want our sites to load quickly

Detour: Languages? Scripts?

- Sometimes used interchangeably, not the same
- Languages use writing systems/scripts
- One language can use multiple scripts: former soviet countries use Cyrillic and Persian/Arabic scripts
- Multiple languages can share scripts: Many European languages use Latin script
- Languages can use different subsets of a script: English (26), Māori (15), Icelandic (32) - all Latin script

Unicode

- Solves for how to encode characters in digital medium
- Codepoints given to every character (including emoji)
- Over 150,000 characters identified in unicode
- U+0041 → A
- Used in HTML like `A`

Unicode: Latin

Basic, Supplemental, Extended A, Extended B...

Why self-host?

Why self-host?

- No global CDN benefit due to cache partitioning (5+ years)
- Privacy issues with loading from a third-party domain
- Control + not relying on a third party for site styles

obligatory
sometimes you
can't self host 🥲

Larger character set = larger font file

Wider language support

- You'll want to use a font collection, not one single font file
 - Font settings are different e.g. Latin vs Arabic
 - OpenType glyph count maximum (65,000)
- Noto (over 200 fonts for 150 writing systems)
- IBM Plex Sans (14 fonts, 10 writing systems)

CJK Unified Ideographs
